Successful rebuild of a VariStep winder at Leipa Georg Leinfelder GmbH in Schwedt

Jagenberg Paper GmbH, with its headquarters in Krefeld, Germany, is an expert in the production and modernization of machines and systems in the paper industry. The company offers internationally customized solutions tailored to customer requirements.

At Leipa Georg Leinfelder GmbH in Schwedt, Jagenberg Paper successfully rebuilt a VariStep winder. Thanks to the customised concept of the gluing device, the customer can now neatly seal all finished rolls in the machine fully automatically, thus shortening the set-change times. All necessary functionalities were integrated into the existing control system and the safety technology was expanded. New web infeed components additionally ensure safe operation.

The rebuild was carried out during the annual shutdown and was subsequently accompanied by a production optimisation phase with regard to all paper grades.

We would like to thank our customer for the successful and trusting cooperation.
